

Three Everbright Hui Yi Capital Management ventures obtain New OTCBB listing approval

14 October 2015 - **China Everbright Limited** (“CEL”; Stock Code: 165.HK)’s Everbright Hui Yi Capital Management, a Venture Capital Fund management platform under CEL, today announced that the National Equities Exchange and Quotations Co., Ltd. has approved the applications by Shenzhen’s Newplan Design Co., Ltd. (“Newplan”), Beijing Yonder Environmental Technology Co., Ltd. (“Yonder Environment”) and Hubei Surpass Sun Electric Co., Ltd. (“Surpass Sun”) to be listed on the New OTCBB market. The approvals were made on 15 September, 18 September, and 24 September respectively. The three companies will be formally listed in October 2015.

Newplan (stock code: 833721) provides clients with integrated solutions based on branding and product competitiveness. Its operations cover the full range of product innovation, including market and user research, brand and product planning, product design and design commercialisation services. A leader in industrial design, Newplan is the first Chinese design company to be awarded the “Red Dot Grand Prix Award”, considered by many to be the top honour in the design industry. In addition to several other Red Dot Design Awards, it has won global design awards including the iF Gold Award and IDEA. A familiar and influential name in consumer electronics, medical equipment and industrial facilities, Newplan’s clients include international and Chinese corporations such as GE, Motorola, Thomson, Siemens, Philips, Lenovo, Gree, Midea, Haier, Huawei, ZTE and Mindray.

Yonder Environment (stock code: 833755) is primarily engaged in the comprehensive applications of coal mine methane (CMM), with substantial involvement in coal mine gas-based power generation, biogas power generation, waste-to-energy power generation and new energy. Yonder Environment is a state-level hi-tech and new technology enterprise and a standing member of the China Industry Energy Conservation and Clean Production Association. It has developed CMM power generation projects in Shanxi, Guizhou and other locations, making it the private company with the largest installed generating capacity based on low-concentration CMM in China.

Surpass Sun’s (stock code: 833832) products include photovoltaic (PV) EPC and equipment, the power supply series and the power quality optimisation series. A one-stop service provider for PV power stations and distributed power generation, Surpass Sun is a hi-tech and new technology company that develops PV inverters, power charging facilities for electric cars, integrated power batteries, active filter and reactive power compensation equipment, and high- and low-voltage soft starters and related accessories. Its products are widely used in PV power generation, financial data centres, telecommunications, optoelectronics, automobiles and aerospace, as well as various sectors of the national economy including national defence, railways, metallurgy, petrochemicals, electricity, water conservancy, mining, light industry, machinery, shipbuilding and municipal services. Surpass Sun products are exported to dozens of countries and regions around the world.

Until now, Everbright Hui Yi Capital Management has completed investments in a total of 26 projects. Of these, CECEP Wind-power, Hanbang Gaoke and Jiawei have been listed on China’s A-share market and another nine projects have been listed on the New OTCBB market.
